EDUCATION

Ontario Tech University

Bachelor of Science (Honours) Computer Science

Oshawa, Ontario

Sep. 2021 – May 2025

EXPERIENCE

Warehouse Order Picker

June 2021 – August 2021

Burgham Sales

Pickering, ON

- Worked with inventory tracking software and handheld scanning devices to manage warehouse data accurately.
- Investigated and resolved inventory discrepancies to ensure accurate stock records
- Coordinated with team members to prioritize urgent orders and maintain workflow efficiency
- Adapted quickly to new software tools and warehouse technologies

OTU Computer Science Club Member

Sept 2023 – May 2025

Ontario Tech University

Oshawa, ON

- Engaged with a community of students passionate about computer science, technology, and software development.
- Attended technical presentations and professional development sessions to expand knowledge of computer science concepts.

PROJECTS

ClipSphere | *Flutter, Dart, Firebase Authentication, Cloud Firestore, Firebase Storage* March 2025 – April 2025

- Developed a cross-platform mobile application using Flutter that enables users to create accounts, upload videos, and interact with content in a social media environment.
- Built a scalable backend using Cloud Firestore to store user profiles, video metadata, comments, and user data
- Integrated cloud-based authentication, database, and storage services to create a scalable full-stack mobile application.
- Designed and developed responsive user interfaces with reusable Flutter widgets to improve maintainability and user experience.
- Implemented real-time database synchronization using Firestore streams to enable live updates across users and devices.

TutorSeed | *React, Next.js, Artificial Intelligence*

July 2025 – August 2025

- Built an AI-powered learning platform that uses Socratic questioning to guide users through problem-solving instead of providing direct answers.
- Designed prompt engineering workflows to enforce step-by-step reasoning, adaptive guidance, and a growth-focused learning style.
- Developed a responsive web application using Next.js and React for an interactive tutoring experience.
- Integrated large language model APIs to provide dynamic, context-aware tutoring across programming and academic subjects.

Ontario Tech ICS Generator | *Web scraping, icalendar, REST API, Python* September 2024 – September 2024

- Built a CLI tool that generates .ics calendar files from Ontario Tech course schedules for easy import into Google Calendar and other calendar apps.
- Implemented web scraping and API-based authentication to securely retrieve student schedule data from university systems.
- Automated the conversion process to eliminate manual scheduling and improve usability for students.
- Created a lightweight Flask backend with a simple frontend for easy event setup and management.

TECHNICAL SKILLS

Languages: Java, Python, C/C++/C#, SQL, JavaScript, HTML/CSS, R, Dart, Typescript, LaTeX

Frameworks: React, Node.js, Next.js, Flask, Firebase, WordPress, Google Cloud Platform, PyTorch, TensorFlow, Express.js

Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, PyCharm, IntelliJ, Eclipse, Unity, Overleaf

Libraries: pandas, NumPy, Matplotlib, Dart SDK, React Hooks, Firebase SDK, BeautifulSoup, iCalendar, OpenAI API, Gemini API, PyGame, Flask
