EDUCATION

Ontario Tech University

Bachelor of Science (Honours) Computer Science

Oshawa, Ontario

Sep. 2021 – May 2025

EXPERIENCE

Full-Stack / Systems Engineer (Freelance)

June 2026 – Present

Eternal Stream

Remote

- Engineered a 24/7 RTMP media streaming platform for paid creator clients, reliably broadcasting multi-hour VOD loops to live Twitch audiences of 1,000+ concurrent viewers.
- Built robust FFmpeg processing pipelines in Node.js.
- Deployed and managed production Linux environment on an OVHcloud VPS using PM2, optimizing page cache memory and swap allocation for constant uptime.

OTU Computer Science Club Member

Sept 2023 – May 2025

Ontario Tech University

Oshawa, ON

- Engaged with a community of students passionate about computer science, technology, and software development.
- Attended technical presentations and professional development sessions to expand knowledge of computer science concepts.

Warehouse Order Picker

June 2021 – August 2021

Burgham Sales

Pickering, ON

- Worked with inventory tracking software and handheld scanning devices to manage warehouse data accurately.
- Investigated and resolved inventory discrepancies to ensure accurate stock records.

PROJECTS

TutorSeed | *React, Next.js, Node.js, Gemini API, Tailwind CSS*

July 2025 – August 2025

- Built an AI-powered learning platform that uses Socratic questioning to guide users through problem-solving instead of providing direct answers.
- Designed prompt engineering workflows to enforce step-by-step reasoning, adaptive guidance, and a growth-focused learning style.
- Developed a responsive web application using Next.js and React for an interactive tutoring experience.
- Integrated large language model APIs to provide dynamic, context-aware tutoring across programming and academic subjects.

ClipSphere | *Flutter, Dart, Firebase Authentication, Cloud Firestore, Firebase Storage*

March 2025 – April 2025

- Developed a cross-platform mobile application using Flutter that enables users to create accounts, upload videos, and interact with content in a social media environment.
- Built a scalable backend using Cloud Firestore to store user profiles, video metadata, comments, and user data.
- Integrated cloud-based authentication, database, and storage services to create a scalable full-stack mobile application.
- Implemented real-time database synchronization using Firestore streams to enable live updates across users and devices.

Ontario Tech ICS Generator | *Web Scraping, iCalendar, REST API, Python, Flask*

September 2024 – September 2024

- Built a CLI tool that generates .ics calendar files from Ontario Tech course schedules for easy import into Google Calendar and other calendar apps.
- Implemented web scraping and API-based authentication to securely retrieve student schedule data from university systems.
- Created a lightweight Flask backend with a simple frontend for easy event setup and management.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C/C++, C#, SQL, Dart, HTML/CSS, R, LaTeX

Frameworks & Web: Next.js, React, Node.js, Express.js, Flask, Flutter, Firebase, Tailwind CSS, WordPress

DevOps & Tools: Git, Linux (Ubuntu), FFmpeg, PM2, OVHcloud VPS, Docker, Google Cloud Platform, Unity

Libraries: Gemini API, OpenAI API, pandas, NumPy, Matplotlib, BeautifulSoup, iCalendar
